Expense Notes

Most business meals are only 50% deductible but please include the entire amount. Do not include your receipts. If your return is examined (audited) you must be able to show the date, place, amount (not "lavish or extravagant") and business purpose of the meal.

If you are using your personal vehicle or your home for business you are essentially converting a portion of your personal property to business use property. This allows you to take a deduction but also creates tax consequences when that property is sold!
